

HOW TO: TAKING COMMUNITY COLLEGE COURSES

1. Verify course transferability on assist.org.

ASSIST is a database that includes a complete listing of UCI's articulation agreements with community colleges in California.

2. Take the course and submit your community college transcript to UCI Office of Admissions.

It may take some time for the Office of Admissions to process your request.

3. Contact the Engineering Undergraduate Student Affairs for any questions.

If the course processes on your DegreeWorks as an "Elective", advisors will be able to apply the course to the correct requirement.
